Project Team Working on The First Community Survey

The City's Age-Friendly Community Project Team continued their effort during their February meeting. The Project Team finalized and approved their first community outreach survey, focusing on Communication and Information. The survey will provide an opportunity for the community to help identify the best method of communication between the City and the public. The Project Team will use the responses from the survey to identify the most effective ways of disseminating information.

The Project Team also created a robust outreach plan to ensure as many community members will see the survey as possible. The Project Team will utilize postcards mailers, digital communication, and City's contacts with various community groups to get the message out to the community.

The Communication Survey is a crucial first step for the Project Team to take as they work on all domains of livability.

Following the survey results and the Teams analysis, there will be methods/practices recommended by the Team to implement and improve communications between the City and the community.
