

## Hauling and Maintenance Operations for Halls Debris Basin

Los Angeles County Public Works will begin operations to remove sediment and debris from the Halls Debris Basin in La Canada Flintridge to ensure public safety and provide critical flood protection to downstream communities. Materials removed from the debris basin will be transported to the LA County Dunsmuir Sediment Placement Site, in Glendale. Project area map enclosed.

### SCHEDULE

Sediment hauling is scheduled to start on **October 2, 2023** and will be completed by mid-November 2023, weather permitting.

Work will take place Monday through Friday from 7:30 a.m. to 4:00 p.m.

### PARKING

Please do not park vehicles or store materials on streets near the debris basin. "No Parking" signage (if necessary) will be posted 48 hours in advance of maintenance activities.

### IMPORTANT NOTE

Hauling and maintenance activities are monitored by Public Works to ensure observance of all traffic and safety laws. Public Works appreciates your patience and understanding during this project.

### CONTACT INFORMATION

For questions, please contact Jonathan King, assistant area engineer, at (818) 896-0594, Monday through Friday from 7 a.m. to 5 p.m. or email [JKing@pw.lacounty.gov](mailto:JKing@pw.lacounty.gov).

For after-hours assistance, please contact LA County Public Works 24-hour Dispatch Center at (800) 675-HELP (4357).

LA County Public Works operates and maintains the LA County Flood Control District facilities that provide flood protection and captures, cleans and conserves stormwater for local water supply. For more information about the Flood Control District visit our webpage at [pw.lacounty.gov/LACFCD](http://pw.lacounty.gov/LACFCD) or scan the QR code below.
